¹ Not available for applicants to the Adelaide School of Nursing.
² Check closing date for Mature Application Registration on the [NMBI website](http://www.nmbi.ie)
³ Further education and training.
This publication, Nursing/Midwifery: A career for you, is primarily aimed at those wishing to apply for the pre-registration honours degree programmes in:

- Children’s and General Nursing (Integrated)
- General Nursing
- Intellectual Disability Nursing
- Midwifery
- Psychiatric Nursing

It is important to note that changes may occur to any of the contents of this publication.

Updates to this publication (for example, additional places) may be viewed on our website and on the CAO website.

The onus is on each applicant to check our NMBI website, and with the higher education institutions (HEIs) and the CAO for any changes regarding the competition.

For any questions about nursing and midwifery careers that are not answered in this booklet or on our website, then please email us at careersinformation@nmbi.ie.

Abbreviations used in this document

CAO: Central Applications Office
CHI: Children’s Health Ireland
CMS: Clinical Midwife Specialist
CNS: Clinical Nurse Specialist
DARE: Disability Access Route to Education

DOH: Department of Health
EU: European Union
FET: Further education and training
FETAC: Further Education and Training Awards Council
HEAR: Higher Education Access Route

4 Psychiatric Nursing is also called Mental Health Nursing in some HEIs.
About NMBI

NMBI is the regulator for the professions of nursing and midwifery in Ireland. It has a statutory obligation to protect the integrity of the practice of the professions of nursing and midwifery and to protect the public.

- It maintains a Register of Nurses and Midwives and a Candidate Register for student nurses and midwives;
- Sets the standards for the education and training of nurses and midwives;
- Approves and monitors programmes of education necessary for registration;
- Provides guidance on professional conduct and ethics for registered nurses and midwives; and
- Investigates and considers complaints against nurses and midwives who practise in Ireland.

NMBI’s functions are defined in the Nurses and Midwives Act 2011.

Please note that the terms ‘candidate’, ‘student’, ‘student nurse’ and
‘student midwife’ are all used interchangeably in this booklet.
Nursing and Midwifery – an Overview
This section provides an overview of nursing and midwifery and the core values of the professions.

**Nursing**

Nursing encompasses autonomous and collaborative care of individuals of all ages, families, groups and communities, sick or well and in all settings. Nursing includes the promotion of health, prevention of illness, and the care of ill, disabled people and those requiring end of life care. Advocacy, promotion of a safe environment, research, education, participation in shaping health policy, and in patient and health systems management are also key nursing roles (ICN).

**Midwifery**

Midwifery is the profession of midwives, only midwives practise midwifery. It has a unique body of knowledge, skills and professional attitudes drawn from disciplines shared by other health professions such as science and sociology but practised by midwives within a professional framework of autonomy, partnership, ethics and accountability.

Midwifery is an approach to care of women and their newborn infants whereby midwives:

- optimise the normal biological, psychological, social and cultural processes of childbirth and early life of the newborn
- work in partnership with women, respecting the individual circumstances and views of each woman
- promote women’s personal capabilities to care for themselves and their families
- collaborate with colleagues and other health professionals as necessary to provide holistic care that meets each woman’s individual needs

Midwifery care is provided by an autonomous midwife (ICM).
Core values of nursing and midwifery

Three core values Compassion, Care and Commitment inform decision-making by guiding each nurse and midwife to deliver safe and effective care.

Compassionate nursing and midwifery practice is characterised by an appreciation, sensitivity, gentleness and deep concern that demonstrates an understanding of the person.

Care is the essence of nursing and midwifery practice and is defined as a cluster of practices performed competently.

Commitment is associated with professional courage to do the right thing for people (Department of Health, Office of the Chief Nursing Officer, Position Paper One, Values for Nurses and Midwives in Ireland, June 2016).

Scope of nursing and midwifery practice for registered nurses and midwives

The scope of nursing and midwifery practice in the Republic of Ireland is the range of roles, functions, responsibilities and activities that a nurse/midwife is educated, competent in, and has authority to perform.

An individual nurse’s or midwife’s scope of practice is dynamic – that is, it will change and grow with career progression. Graduation, followed by registration, is the first rung on the career ladder to a fulfilling, challenging and exciting career as a nurse or midwife. It is the springboard for a career that provides a diversity of opportunity. Career opportunities and pathways are for the most part divided between:

- Clinical
- Management
- Education and research
Clinical roles

Clinical means working as a nurse or midwife directly with patients and clients. The career options to work as a clinician are:

- Staff Nurse/Staff Midwife
- Clinical Nurse/Midwife Specialist (CNS/CMS)
- Registered Advanced Nurse/Midwife Practitioner (RANP/RAMP)

Management roles

Management means supervising nursing/midwifery staff and their provision of care to patients and clients. There are three front-line nursing and midwifery management roles: Clinical Nurse/Midwife Manager I, II and III. Additionally there are Assistant Director of Nursing, Assistant Director of Midwifery, Director of Nursing and Director of Midwifery roles. These roles are organisational and strategic, and are generally part of corporate management and stewardship of organisations.

Education and research

Education career pathways tend to be either in higher education institutions (HEIs), Nursing and Midwifery Practice Development Departments or in the Centres of Nursing and Midwifery Education where undergraduate, postgraduate and continuing professional development courses are delivered. Opportunities include nurse/midwife lecturers with progression to senior lecturerships or professorships within the Schools of Nursing and Midwifery.

Research pathways may be within a clinical role or nurses/midwives can work as researchers in a variety of research facilities.

Opportunities to learn

There are countless opportunities to learn and to build on skills. For further education opportunities following initial registration, see Section 9.
Further information

Entry Requirements for Applicants
Please note that a new grading system for the Leaving Certificate was introduced in 2017. We have mapped our entry requirements to the new grading system. For full details on the system, visit www2.cao.ie/downloads/documents/commonpointsscale2017.pdf.

NMBI education entry requirements

The criteria for admission to education and training programmes are set out in the Nurses and Midwives (Education and Training) Rules 2018:

4. (1) A person seeking admission to an education and training programme leading to first time registration in the register of nurses and midwives must—

(a) have obtained in the Leaving Certificate Examination a minimum of Grade H5 in two papers and a minimum of Grade O6/H7 in four papers in the following subjects:

(i) Irish or English;
(ii) Mathematics;
(iii) a Laboratory Science Subject (Biology, Physics, Chemistry, Physics and Chemistry or Agricultural Science); and
(iv) three other subjects,

(b) have achieved the equivalent minimum educational attainments to those referred to in subparagraph (a), such equivalent attainments to be adjudicated upon by the third level institution concerned,

(c) meet the minimum educational requirements specified by the third level institution concerned for entry to the programme, provided that such requirements are not of a lower standard than those set out in subparagraph (a).

Please note that foundation level Mathematics or foundation level Irish are not acceptable.
Higher Education Institutions’ education entry requirements

The following are the basic minimum requirements for each HEI. Each HEI may have specific requirements regarding combination of subjects permitted or subjects that may not be presented at all. It is essential to consult the HEI literature regarding the information in Table 11.

Table 11 HEI entry requirements

\(^5\) Applicants that have an official Department of Education exemption from Irish in the Leaving Certificate, must apply to the NUI for exemption and include another subject to make up the six subjects specified above.
Equivalent qualifications

Applicants not presenting the Republic of Ireland Leaving Certificate Examination minimum education requirements, must have obtained equivalent education qualifications.

Applicants must clarify this well in advance of the closing date, including the methods of evaluation of results of examinations and qualifications other than the Republic of Ireland Leaving Certificate Examination.

Applicants must consult the HEI literature and contact the admission office of the HEIs, and refer to the CAO website for further information.

Quality and Qualifications Ireland (QQI)

QQI was established in 2012 as the state agency for quality assurance and qualifications for all education and training in Ireland. QQI is responsible for the National Framework of Qualifications (NFQ) and makes awards based on agreed standards for the 10 levels of the NFQ. Awards made by the former agencies of FETAC and HETAC continue to be recognised. QQI through NARIC Ireland provides advice on foreign qualifications.

Nursing and Midwifery degree programmes via further education and training (FET) awards made by QQI

Most institutions offering the pre-registration honours degree programmes in nursing/midwifery consider specific Level 5 and some Level 6 awards as an equivalent (to the Republic of Ireland Leaving Certificate Examination) entry route for applicants to nursing and midwifery, using the CAO application process.

For details of participating institutions and their quota of places, please visit www2.cao.ie/fetac/fetacnursingquota.pdf.

---

4 For advice on foreign qualifications, please refer to www.naric.ie where information on the comparability of foreign qualifications can be provided by NARIC Ireland. This service is hosted by QQI.
The QQI FET awards that provide links to Nursing and Midwifery degree programmes include:

- Nursing Studies (5M4349)
- Healthcare Support (5M4339)
- Community and Health Services (5M4468)
- Health Service Skills (5M3782)

Must achieve distinctions in five components including:

- Anatomy and Physiology (5N0749/D20001)
- Nursing Theory and Practice (5N4325)
- Human Growth and Development (5N1279) or Biology (5N2746)

For further details please contact the admissions office of the individual HEIs or visit www.cao.ie or www.qqi.ie.

Leaving Certificate Vocational Programme (LCVP)

HEIs award points for results in Leaving Certificate Vocational Programme Link Modules, in place of a sixth Leaving Certificate subject. This is for points purposes only – the minimum education entry requirements must be attained.

- Distinction = 66 points
- Merit = 46 points
- Pass = 28 points

Points scoring Republic of Ireland Leaving Certificate Examination

The six best results, in recognised subjects, in one Leaving Certificate Examination sitting will be counted for points purposes.

Please note that the CAO adds 25 bonus points to the points score for Leaving Certificate higher level Mathematics at grades H6 and above.

Points for applicants

For information on the minimum points required, please visit the CAO website [www.cao.ie](http://www.cao.ie).
Pre-Registration Honours Degree Programmes in Nursing and Midwifery
Programmes leading to registration with NMBI

There are 45 pre-registration honours degree programmes in Ireland. These programmes are divided into nursing (four disciplines) and midwifery. Each programme leads to a specific registration (see Table 1).

The nursing disciplines include:
- Children’s and General (Integrated) Nursing
- General Nursing
- Intellectual Disability Nursing
- Psychiatric Nursing

All 45 programmes are honours bachelor’s degree programmes at Level 8 on the National Framework of Qualifications (NFQ). The academic award is Bachelor of Science (BSc).

Number of programmes and places

The number of places on the 44 programmes through the CAO are illustrated in Table 1 overleaf.

7 This is a dynamic quota and it may vary.
8 This is also called Mental Health Nursing in some HEIs.
9 Correct at time of publication
Independent Provider - Hibernia College

Hibernia College offers an undergraduate general nurse education programme. The programme is designed to provide learning opportunities for mature students, graduates of further education programmes and school leavers who wish to undertake a full-time Level 8 Degree programme. Applications are not managed through the CAO. For information on the application process please refer to the Hibernia College website.

Pre-registration honours degree programmes in nursing and midwifery

Table 2 gives details of the 13 HEIs offering the 44 pre-registration honours degree programmes, together with the main associated healthcare agencies and the number of places per programme. The clinical part of a programme will be completed with the healthcare agencies.

Please note that although the main associated healthcare agencies are listed, other healthcare agencies may also be used for clinical placements. Such healthcare agencies may be a considerable distance from those listed in Table 2. Contact the individual HEIs for further details about the location of the placements.

In the situation where more than one healthcare agency associated with a HEI has the same course code, the allocation to clinical placements will be decided locally. Check with the HEI concerned.

It is essential to use the correct course code when making an application. Check the CAO website for any changes to programme details.

In relation to the Children's and General (Integrated) Nursing programmes, Table 2 only indicates the children's healthcare agencies concerned. Clinical placements for General Nursing will be allocated by the general healthcare agencies associated with the HEI.

Please refer to our website for full details of all approved Nursing and Midwifery courses.

Programme purpose

Nursing

The purpose of the registration education programme is to ensure that on successful completion of the programme the graduate is equipped with the knowledge, understanding, professional attributes and skills necessary to practise as a competent and professional nurse. The overarching aim of the programme is to ensure that the graduate acquires the competences for critical analysis, problem-solving, decision-making, collaborative team working, leadership, professional scholarship, effective interpersonal communication and reflection that are essential to the art and science of nursing.

Midwifery

A student engaging in a pre-registration honours degree programme must observe standards of conduct and behaviour commensurate with our requirements for entering the nursing/midwifery profession. Additionally, while on clinical placement, students are required to adhere to local policies and requirements.

The purpose of midwife registration education programmes is to equip midwifery students with the necessary knowledge and skills and professional behaviours (ICM, 2011) to practise as a competent midwife capable of autonomously carrying out all of the activities of a midwife as set out in the EU Directive 2005/36/EC.

<tr>
<td><strong>Total</strong></td>
<td><strong>144</strong></td>
<td><strong>170</strong></td>
</tr>
</tbody>
</table>

The 36-week internship takes place during the fourth year, and includes a salary (see page 31). Normal third-level college holidays do not apply during the internship year.

Students undertaking the registration education programme have supernumerary status\(^1\) during the programme with the exception of a final placement of 36 weeks’ rostered clinical placement (internship), which consolidates the completed theoretical component of the programme.

Following any interruption\(^2\) in the educational programme, the HEI in partnership with the healthcare institutions must ensure that students meet the programme requirements.

For full details of the programme structure, contact the relevant HEI.

\(^{1}\) Inclusive of annual leave.

\(^{1}\) The student will be surplus to the rostered complement of nurses/midwives.

\(^{2}\) Any leave (other than annual leave and bank holidays).
Competencies

The competencies for entry to the nurses division and the midwives division of the NMBI Register are clearly aligned with the Code of Professional Conduct and Ethics for Registered Nurses and Registered Midwives (NMBI, 2021). All domains of competence outlined below represent the level students must reach, on completion of the education programme, for entry to the NMBI Register.

Nursing

The student nurse will be required to have achieved competence in the following domains of practice:

- **Professional values and conduct of the nurse competences**
  Knowledge and appreciation of the virtues of caring, compassion, integrity, honesty, respect and empathy as a basis for upholding the professional values of nursing and identity as a nurse.

- **Nursing practice and clinical decision-making competences**
  Knowledge and understanding of the principles of delivering safe and effective nursing care through the adoption of a systematic and problem-solving approach to developing and delivering a person-centred plan of nursing care based on an explicit partnership with the person and their primary carer.

- **Knowledge and cognitive competences**
  Knowledge and understanding of the health continuum, life and behavioural sciences and their applied principles that underpin a competent knowledge base for nursing and healthcare practice.

- **Communication and interpersonal competences**
  Knowledge, appreciation and development of empathic communication skills and techniques for effective interpersonal relationships with people and other professionals in healthcare settings.

---

13 Nursing includes general, psychiatric, intellectual disability and children’s. Refer to: Nurse Registration Standards and Requirements (NMBI, 2016).
• **Management and team competences**
  Using management and team competences in working for the person’s wellbeing, recovery, independence and safety through recognition of the collaborative partnership between the person, family and multidisciplinary healthcare team.

• **Leadership potential and professional scholarship competences**
  Developing professional scholarship through self-directed learning skills, critical questioning/reasoning skills and decision-making skills in nursing as the foundation for lifelong professional education, maintaining competency and career development.

---

**Midwifery**

The student midwife will be required to have achieved competence in the following principles of practice:

• The midwife’s practice is underpinned by a philosophy that protects and promotes the safety and autonomy of the woman and respects her experiences, choices, priorities, beliefs and values.

• The midwife practises in line with legislation and professional guidance and is responsible and accountable within their scope of midwifery practice (this encompasses the full range of activities of the midwife as set out in Directive 2005/36/EC and the adapted Definition of the Midwife (ICM, 2011) as adopted by NMBI).

• The midwife uses comprehensive knowledge, skills and professional behaviours to provide safe, competent, kind, compassionate and respectful care. The midwife keeps up-to-date with current midwifery practice by undertaking relevant continuing professional development.

• The midwife works in equal partnership with the woman and her family and establishes a relationship of trust and confidentiality.

• The midwife communicates and collaborates effectively with the woman, and the woman’s family and with the multidisciplinary healthcare team.

---

14 The competencies for entry to the midwives division of the Register are based upon the *Midwife Registration Programmes: Standards and Requirements* (NMBI, 2016).
Making an Application
Applying to the CAO

Applications are made to the CAO online at [www.cao.ie](http://www.cao.ie). Before completing the application form, carefully study the literature of the HEIs and the CAO Handbook 2022 and any subsequent changes to these documents. For queries regarding eligibility for consideration of a place on a Nursing or Midwifery programme, please consult the literature of the HEIs and contact the admission office of the HEIs.

Please choose up to 10 Nursing and Midwifery course codes in the Level 8 category, listed in order of preference.

Applications

**Applicant**

Application based on examination results. Please check the relevant HEI literature regarding the minimum entry age. Minimum education requirements of both NMBI and the HEI(s).

**Mature applicant**

Must be 23 years of age or over by 1 January in the year of entry to be considered for a place on the grounds of mature years. **Consideration will be based on performance in the assessment test.**

**QQI/FET Applicant**

Registered nurse or midwives must complete a BSc level 8 honours degree in the relevant discipline (approved by the NMBI). It is possible to enter this course through the QQI FET/FETAC entry route rather than leaving certificate points. Please refer to the [Entry Routes](http://www.cao.ie) guide on the NMBI website.
Application using the Higher Education Access Route (HEAR)

The Higher Education Access Route (HEAR) is a third level alternative admissions scheme for school leavers, resident in the Republic of Ireland, who are underrepresented at Higher Education due to their socio-economic background. Applicants applying for HEAR must be under the age of 23 as of 1 January in the year of entry. HEAR applicants must meet a range of financial, social and cultural indicators to be considered for a reduced points place and extra college support. Further Educational Training (FET) students have different admissions routes. See details at www.accesscollege.ie/hear/index.php.

To be considered for HEAR, applicants must have registered on the CAO system by 1 February 2022 at 5.00pm. To apply to HEAR, indicate this on the CAO application and fully and correctly complete all elements of the online HEAR form by 5.00pm on 1 March 2022. Supporting documents for HEAR applicants must be sent to CAO offices before 15 March 2022 at 5.00pm.

Application using the Disability Access Route to Education (DARE)

The Disability Access Route to Education (DARE) is a third level alternative admissions scheme for school leavers whose disabilities have had a negative impact on their second level education. Applicants applying for DARE must be under the age of 23 as of 1 January in the year of entry. Eligible DARE applicants can compete for reduced points places in participating colleges. Applicants to DARE can present with an Irish Leaving Certificate, A-Levels and/or other EU qualifications. Applicants applying on the basis of Further Education and Training (FET) results have different admission routes. See details at www.accesscollege.ie/dare/index.php. Please also refer to the section Health Requirements on page 46 of this booklet if using this scheme.

To be considered for DARE, applicants must have registered on the CAO system by 1 February 2022 at 5.00pm. To apply to DARE please answer YES to Question 1 ('Do you wish to be considered for DARE?') on Section A of the fully completed Supplementary Information Form (SIF) by 5.00pm on 1 March 2022. Supporting documents for DARE applicants must be sent to CAO offices before 15 March 2022 at 5.00pm.
Late applications

Late applications are those received after 5.00pm on 1 February 2022. The closing date for late applications is 5.00pm on 1 May 2022, subject to the restrictions listed in the CAO Handbook 2022. Late applications are not available for applications to the Adelaide School of Nursing.

The online facility for late applications opens on 4 March 2022 at 12.00 noon – a fee of €60 applies.

Change of mind

At the beginning of May, a change of mind facility is available through the CAO until 1 July 2022. This facilitates a change the courses already applied for. For full details about the change of mind facility, please visit the CAO’s website.

Offers

Applications are assessed in accordance with CAO procedure. Please read CAO Handbook 2022 sections: The Offer Stage, Deferring a Place and Available Places.

The timetable of offers is as follows:

<table>
<thead>
<tr>
<th>July</th>
<th>First offers of places to mature applicants will take place in early July. If necessary, further offers may be made in early August.</th>
</tr>
</thead>
<tbody>
<tr>
<td>August</td>
<td>First offers of places to applicants (QQI FET) will take place in early August.</td>
</tr>
<tr>
<td></td>
<td>First offers of places to applicants (excluding QQI FET) will take place following the results of the Leaving Certificate Examination (Round One).</td>
</tr>
<tr>
<td>September</td>
<td>Offers continue to be made as needed until late September.</td>
</tr>
</tbody>
</table>
Offers will be issued by post and may also be viewed and accepted on the CAO website.

It is important to remember that cut-off points/scores for each programme are determined by the relative supply–demand situation including the:

- number of applicants
- points/scores achieved by the applicants
- number of places available.

**Allowances and grants**

**Uniform**
A set allocation of uniforms are provided by the healthcare agency.

**Salary**
Student nurse and midwife pay rates, in respect of their 36 week placement period, are set at 70% of the first point of the staff nurses and midwives incremental pay scale (see HSE HR Circular 005/2016).

**Free fees initiative**
The higher education institutions determine eligibility for free fees. For queries about fees, please contact the relevant college for further information.

**Third-level student grants**
SUSI (Student Universal Support Ireland) is Ireland’s single national awarding authority for all higher and further education grants. To apply for a grant, indicate this on the CAO online application. The CAO will provide identification and offer/acceptance details to the grant authority. Other than providing these details to the grant authority, the CAO plays no role in processing grant applications. For full details on applying for a grant, please visit the SUSI website.
Clinical Component of the Pre-Registration Honours Degree Programmes
Children’s and General Nursing (Integrated)

The Children’s and General Nursing (Integrated) programme facilitates the development of professional knowledge, skills and attitudes necessary to meet the healthcare needs of individuals along the life spectrum. This programme offers a dual registration in both the children’s division and the general division of the NMBI Register. Children’s nurses provide nursing care for children and young people, mostly within the hospital environment. Children have unique needs and one of these needs is the involvement of their family in their care. Children’s nurses therefore work in partnership with the child and the family to promote, maintain or restore optimum health and wellbeing. Children’s and general nurses work with a multidisciplinary team across a wide range of healthcare settings and in different roles.

The list of topics included in the syllabus is not exhaustive. It provides an indication of the content of the Children’s and General Nursing (Integrated) programme in terms of the range of topics and gives no indication of the weighting of each topic in the curriculum. The syllabus allows scope for the continuing development of subject matter and for the acquisition of new knowledge to accommodate emerging trends in nursing, healthcare and society.

The following is the minimum number of weeks that must be spent in different aspects of practice instruction over the educational programme.
<table>

**General Nursing**

Nursing is an interpersonal caring process that acknowledges the uniqueness of the person. The General Nursing programme contains the essential elements that facilitate the development of professional knowledge, skills and attitudes necessary to meet the nursing needs of patients who are acutely or chronically ill. General nurses also have an important role in the promotion of health.

\textsuperscript{15} Public Health Nurse

\textsuperscript{16} Registered Nurse
The healthcare services and the work trends of general nurses are changing continuously and the general nurse must be able to respond to the health needs and demands of the Irish population.

Nursing practice also involves working with other professions and the General Nursing programme aims to develop nurses who will act as effective members of a healthcare team at various levels of the healthcare system.

The list of topics included in the syllabus is not exhaustive. It provides an indication of the content of the General Nurse Registration Education Programme in terms of the range of topics and gives no indication of the weighting of each topic in the curriculum. The indicative syllabus allows for the development of a curriculum that is relevant and responsive to the most recent policy and legislative change.

The following is the minimum number of weeks to be spent in different aspects of practice instruction over the educational programme.

Intellectual Disability Nursing

The RNID (Registered Nurse Intellectual Disability), who works with persons with an intellectual disability, has a diversity of roles. This includes providing nursing support across a variety of environments such as home, education and community settings, as well as specialist practice, e.g. the family home, residential and respite services, schools, primary healthcare and acute settings. Health promotion, guidance and nursing support is provided by the RNID to children, adolescents, adults and their families.

A guiding philosophy of RNID practice is that persons with all levels of ability have the same rights and, in so far as possible, the same responsibilities as other members of society. People with intellectual disability have a right and a need to live within the community and receive those services necessary to meet their specialised and changing needs. They should receive, if and when necessary, professional assistance and services which will allow recognition, development and expression of their individuality. As members of the nursing profession, RNIDs provide specialist nursing services and support that are reflective of the healthcare needs of people with intellectual disability and their families.

The intellectual disability nursing programme contains the essential elements that facilitate the development of professional knowledge, skills and attitudes. The curriculum is diverse, incorporating both theoretical and clinical components. It allows scope for the continuing development of subject matter and for the extension of new knowledge to accommodate emerging trends. This ensures graduate nurses are up-to-date and prepared to embark on a professional career in intellectual disability nursing.

The following is the minimum number of weeks to be spent in different aspects of practice instruction over the educational programme.

Psychiatric Nursing

Psychiatric nursing also known as mental health nursing is a specialist nursing discipline. Psychiatric nurses work with people who are experiencing mental health challenges. The aim of psychiatric nursing is to work in partnership with the person, their family and supporters to enable them to mobilise their own inner resources along with professional supports, in a way that promotes personal growth, development and recovery. At the heart of psychiatric nursing is the development of an empowering therapeutic relationship. The psychiatric nurse journeys with the person and their family through their time of distress facilitating them to find hope, control and opportunity on their recovery journey.

Psychiatric nursing is constantly evolving to meet the challenging mental health needs of diverse groups across Ireland. Psychiatric nurses promote the concept of health and wellbeing in both the hospital environment and community services.

\(^{17}\) Clinical Nurse Specialist

\(^{18}\) Registered Advanced Nurse Practitioner
The nature of psychiatric nursing demands that nurses acquire a broad-based education with particular emphasis on personal and interpersonal knowledge, as well as knowledge from nursing theory and the social, psychological and biological sciences. The education programme provides student nurses with the knowledge, skills and attitudes to meet the needs of the person and their family in an individualised, empowering and culturally sensitive manner.

The following is the minimum number of weeks to be spent in different aspects of practice instruction over the educational programme.

Midwifery

The term ‘midwife’ means ‘with woman’. Midwifery involves the provision of care and support to women during pregnancy, labour and birth, and to women and their babies following birth. Midwives have a key role in health promotion and education for women, their babies and their wider family circle. Midwifery care is underpinned by a philosophical approach that views pregnancy as part of the life cycle, a normal healthy event. The concept of partnership between the woman and the midwife is fundamental to midwifery practice and is based on mutual trust, support and collaboration.

The provision of midwifery care is constantly evolving to respond to the changing needs of women in Ireland and their families. Midwives provide care in maternity hospitals/units, midwife-led units and increasingly through the provision of midwife-led services in the community. Midwives work in partnership with obstetricians and other members of the healthcare team in the provision of care, particularly to women with complicated pregnancies.

The syllabus of the Midwife Registration Education Programme provides an indication of the content. This allows for change to address the changing nature of Irish society and the environment in which midwives practise. The programme provides midwives with the knowledge and skills to meet the needs of women and their families in an individualised, culturally sensitive manner. This supports the vision for the maternity services set out in Creating a Better Future Together – National Maternity Strategy 2016–2026 (Department of Health, 2016) to provide responsive, high-quality maternity care, which is woman-centred, equitable across different parts of the country, accessible to all, safe and accountable.

\(^9\) Special Care Baby Unit
Theoretical Component of the Pre-Registration Honours Degree Programmes
Nursing

Of the theoretical component, 67% covers the art and science of nursing care practice.

Some 33% of the theoretical component is devoted to the applied biological and social sciences, which are the science subjects taught as they apply to, and inform, nursing care practice.

The nursing content of the theoretical component of the programme aims to develop the necessary professional knowledge, skills and attitudes required to meet the nursing needs of patients/clients.

The theoretical component of the pre-registration honours degree programmes has common elements as well as areas very specific to the particular area of nursing.

Midwifery

The content of the theoretical component of the Midwifery programme aims to develop the necessary professional knowledge, skills and attitudes required to meet the midwifery needs of women and their families.

Subjects

Table 9 outlines some of the subject areas that comprise the theoretical component of the programmes.

Please refer to the Standards and Requirements documents which can be downloaded from the NMBI website for a more detailed account of the theoretical components of the programmes.
07

Entry
Requirements for
All Applicants
Health requirements

Nursing and midwifery are demanding professions, both physically and emotionally. This requires good mental and physical health and the ability to achieve the required competencies of a nurse/midwife.

Students will be required to complete a Medical Assessment Self-Declaration Form and undergo a medical assessment/screening and a vaccination programme, etc. as determined by a HEI/healthcare agency.

Students must satisfactorily complete these or other health requirements to commence/continue with the programme.

Garda vetting

Healthcare agencies use the National Vetting Bureau (NVB) to provide a disclosure for each applicant. The assessment of suitability is the responsibility of the relevant organisation. Offers are conditional and could subsequently be withdrawn if garda/police vetting requirements are not met. NMBI have no involvement in garda vetting.

Further details are available from the HEI/healthcare agency.

English competence

If an applicant’s first language/primary mode of expression is not English, evidence of English competence will be required. Please consult the HEI literature and contact the admission office of the relevant HEI for entry requirements.

Additional capabilities

The Nursing and Midwifery programmes require the student to attain competencies by the end of each programme. These include competencies associated with professional and ethical practice, managing and organising nursing and midwifery care, being an effective communicator and within the professional context assessing and making clinical judgements that support persons in meeting their individual health and social needs.
Respect, trust, caring, compassion, commitment and empathy are key personal characteristics associated with the competencies required of nurses and midwives. These characteristics inform the values framework of the *Code of Professional Conduct and Ethics for Registered Nurses and Registered Midwives* (NMBI, 2021) and the *Values for Nurses and Midwives* (Department of Health, 2016).

**Non-EU applicants**

Applicants that are now, or have been in the past, resident outside the EU, must have consulted the HEI literature and have contacted the admission office of the HEIs for the following:

- Definition of non-EU
- Entry requirements and conditions
- Application procedure and eligibility to apply
- Selection procedure
- Economic fee
- Any other matters

If places remain vacant after offers have been made to eligible EU applicants, a person with non-EU status may be considered.

**Please note that we have no role regarding visas/permits nor in defining non-EU status.**

**Applicants expressing a preference for the Adelaide School of Nursing**

The Adelaide School of Nursing is a restricted application course overseen by the Adelaide Health Foundation (AHF), a voluntary charitable organisation.

The Adelaide School of Nursing is open to all; there is no restriction on religious grounds. The restricted nature of the course allows the AHF to fulfil its responsibilities under the Tallaght University Hospital Charter (ensuring that the hospital remains multi-denominational and pluralist).
The AHF offers ongoing financial support in the form of bursaries and scholarships to nursing students in Tallaght University Hospital.

Details of applicants who have expressed a preference for the Adelaide School of Nursing through the CAO are provided to the AHF by Trinity College Dublin. The AHF then issues an application form for completion and return. The completed forms are evaluated by the AHF and nominations are made. Nominated students are eligible to be offered a place in the Adelaide School of Nursing once all other CAO criteria are met.

For further information, please refer to the Adelaide School of Nursing’s website.

Please note that being nominated for the Adelaide School of Nursing does not guarantee an offer of a place. The Adelaide School of Nursing application form process is additional to the other requirements as outlined in this publication.

Not being nominated for the Adelaide School of Nursing does not prejudice the opportunity of an offer of a place on other courses applied for.

**Applicants who are attending or who have attended a third-level programme in Ireland**

Applicants undertaking a programme at a HEI or have previously undertaken a programme at a HEI must contact the admission office of the HEI to determine fees and any other matters.

Applicants previously unsuccessful (academic and/or placement) in any Nursing or Midwifery programme or have any issues which would affect suitability to pursue a career in nursing or midwifery, will only be considered for re-entry to another Nursing or Midwifery programme on a case-by-case appeal basis to the relevant Programme Board. This can be done in writing to the Admissions Officer, and include any relevant details of extenuating circumstances.
Note to all applicants

Applicants are responsible for ensuring that the specified entry requirements and conditions are met.

Applicants should not take the processing of an application at any stage of the competition as an indication of eligibility for the programme(s).

Applicants are responsible for meeting all costs in relation to the application process.

Any attempt by an applicant or by any person(s) acting at instigation, directly or indirectly by means of written communication or otherwise, to canvass or otherwise influence favour will automatically disqualify them from the competition.

If at any time between applying and the end of the competition a change of contact details is required, immediately notify the CAO online.
Entry Requirements for Mature Applicants
NMBI entry criteria

The criteria for admission to education and training programmes are set out in the Nurses and Midwives (Education and Training) Rules 2018:

4. (1) A person seeking admission to an education and training programme leading to first time registration in the register of nurses and midwives must—

(d) in the case of a person who is 23 years of age or over on the first day of January of the year of admission, satisfy the Board in such manner as may be determined by it of his or her suitability to undertake the programme (SI 218 of 2018).

In that respect, we require that all those applicants over 23 years applying for admission to a Nursing or Midwifery programme must sit an assessment test.

The assessment test

Step 1: Complete an application to the CAO
Step 2: Using a valid CAO number, register for the assessment tests
Step 3: Complete the suite of tests within the timeframe

Applicants must be successful in the assessment test to be considered for an offer as a mature applicant. However, success in the test does not guarantee an offer of a place.

The assessment test is year specific and results may not be carried forward to a future year (unless a deferred entry has been granted by a HEI).

Proceeding in the competition

On passing the assessment test, applicants will be placed on order-of-merit lists for the programmes you have applied for (see CAO Handbook 2022 for further details).

Applicants must meet the registration requirements and complete the full suite of assessment tests in order to proceed in the mature competition for nursing/midwifery.
## Timetable for mature applicants 2022

</table>
Sponsorship for public health service employees wishing to qualify as nurses/midwives

The sponsorship scheme is open to Irish public health service employees, such as healthcare assistants and support staff, who are directly involved in the delivery of care to patients or clients within a nursing or midwifery context. Under the scheme your salary is paid for the duration of the programme. This scheme is reviewed and offered on an annual basis.

There are a limited number of places available nationally and these are part of the quota of places for mature applicants. These places are reviewed annually.

To be considered for the sponsorship scheme, applicants must:
• meet all of the conditions as outlined in the relevant HSE HR Circular
• apply as a mature applicant to the CAO
• be successful at the assessment test in the current year
• have applied for sponsorship to the Nursing and Midwifery Planning and Development Unit (NMPDU), Kilkenny by the closing date as specified by the NMPDU
• be offered a place in nursing/midwifery as a mature applicant by the CAO (an offer of a place does not guarantee an offer of sponsorship)
• meet the required terms and conditions as determined by a HEI and healthcare agency.

Further information is available from:
Nursing and Midwifery Planning and Development Unit South East
Kilcreene Hospital Complex
Kilkenny
Telephone (056) 7785620
Further Education Opportunities Following Initial Registration
Nursing and midwifery are lifelong careers. Once successfully completing a pre-registration programme in nursing/midwifery and registering as a nurse or midwife, further education and development is available. For details of our approved courses visit the NMBI website.

NMBI has also approved a number of programmes that lead to further registration and these are outlined below.

**Post-registration programmes**

There are seven post-registration programmes leading to an additional registration with NMBI:

- Children's Nursing
- Midwifery
- Psychiatric Nursing
- Nurse/Midwife Tutor
- Public Health Nursing
- Nurse/Midwife Prescriber
- Advanced Nurse/Midwife Practitioner

Please note that the programme in Children's Nursing is available at both pre-registration level (i.e. integrated with General Nursing) and at post-registration level.

The Midwifery programme and the Psychiatric (Mental Health) Nursing programme are available at both pre-registration level and at post-registration level.

**Children’s Nursing**

Nurses registered in one of the three divisions (RNID, RPN, RGN) of the NMBI Register, may apply to enter the Post-Registration RCN (Registered Children’s Nurse) programme. The programme is 12 months full-time in duration.

Eligibility of additional registration as an RCN is based on successful completion of the programme, and an award of a higher diploma from a HEI.
The three HEIs and the three linked Dublin healthcare agencies offering the Post-Registration RCN programme are:

- DCU in partnership with Children’s Health Ireland at Temple Street
- TCD in partnership with Children’s Health Ireland at Tallaght
- UCD in partnership with Children’s Health Ireland at Crumlin

**Midwifery**

The Post-Registration Midwifery programme leading to the qualification of Registered Midwife (RM) is 18 months full-time in duration. Applicants must first be registered as a general nurse (RGN) before applying for the Post-Registration Midwifery programme.

Eligibility of additional registration as an RM is based on successful completion of the programme and an award of a higher diploma from a HEI.

The seven maternity hospitals and linked HEIs currently offering the Post-Registration Midwifery programme are:

- Our Lady of Lourdes Hospital and DKIT
- University College Hospital Galway and NUIG
- Coombe Women and Infants University Hospital and TCD
- Rotunda Hospital and TCD
- Cork University Maternity Hospital and UCC
- National Maternity Hospital and UCD
- University Maternity Hospital Limerick and UL

For a midwife that has completed an 18-month Post-RGN Midwifery Programme in Ireland and wishes to have an automatic right to register in another EU Member State, they must complete one year’s professional practice pursuing all the activities of a midwife in a hospital or healthcare institution (EU Directive 2005, Section 41(c)).

**Psychiatric Nursing**

Nurse registered in one of the three divisions (RGN, RNID, RCN) of the NMBI Register, may apply to enter the Post-Registration RPN (Registered Psychiatric Nurse) programme. The programme is 12 months full-time in duration.
Eligibility of additional registration as an RPN is based on successful completion of the programme and an award of a higher diploma from a HEI.

The HEI and linked Dublin healthcare agencies offering the Post-Registration RPN programme are:

- UCD School of Nursing, Midwifery and Health Systems in partnership with the HSE Mental Health Services (Community Healthcare Organisation, Area 6, Area 7 and the National Forensic Mental Health Service).

**Nurse/Midwife Tutor**

Registered nurses and midwives may apply to undertake a specific master’s programme. Successful completion of the master’s programme with the appropriate strand, entitles applicants to register as a Registered Nurse Tutor (RNT) or Registered Midwife Tutor.

If a registered nurse/midwife already holds a master’s honours degree in nursing/midwifery or in an allied health science subject, may (subject to the honours degree being deemed suitable) undertake a further postgraduate qualification in education, and subsequently apply for registration as a Registered Nurse Tutor or Registered Midwife Tutor.

This programme is available at:

- MTU
- NUIG
- UCD
- TCD

**Public Health Nursing**

Public health nurses provide primary, secondary and tertiary care to individuals, families and communities across the lifespan to a geographic area. They are key health and primary care practitioners who have been trained and educated as public health workers using a partnership and empowerment approach with individuals, families and communities.
Public health nurses provide a range of services to people in a local community including child health visits and school visits, care on discharge from hospital, and visits and care for older people. Public health can be viewed as a way of looking at health that takes the population as the starting point. With a population perspective, it is possible to identify and address the wider determinants of health such as poverty, unemployment, social exclusion, transport, education, crime and the environment. Thus, public health is viewed as a creative process harnessing political intervention to create circumstances to enable people to live healthy lives, while community-led initiatives support the organised social and policy framework *Healthy Ireland* (Department of Health, 2014).

Registered RGNs that are not registered as a midwife (RM), must also complete a Child and Maternal Health module.

Eligibility of additional registration as an RPHN is based on successful completion of the programme and an award of a higher diploma from a HEI. Further details are available from the HEIs:

- NUIG
- UCD
- UCC

**Nurse/Midwife Prescriber**

Registrants may apply to undertake an education programme leading to registration as a Nurse or Midwife Prescriber. Further information is available from the School of Nursing in:

- DCU
- DKIT
- MTU
- NUIG
- RCSI
- TCD
- UCC
- UCD
- UL
Advanced Nurse Practitioner and Advanced Midwife Practitioner

Advanced practitioners are educated to master’s degree level and have the competencies to be senior decision-makers who undertake a comprehensive advanced physical and/or mental health assessment of patients with complex multiple healthcare needs. They can interpret the results of multiple different assessments and investigations to make a diagnosis, and plan and deliver care.

As team leaders they can confidently and competently make ethical, evidence-based decisions and interventions, and use appropriate therapies when faced with complexity, and assess and manage the risk associated with these decisions. Advanced Nurse Practitioners and Advanced Midwife Practitioners can prescribe and work with individuals to manage their medicines.

Typically, they work independently but also as part of an interdisciplinary/multidisciplinary team where they plan and provide skilled and competent care to meet a patient’s health and social care needs. Involving or referring on to other members of the healthcare team as appropriate they can safely discharge a patient within their scope of practice.

Registered Advanced Nurse Practitioners (RANPs) and Registered Advanced Midwife Practitioners (RAMPs) work within an agreed scope of practice and must meet established criteria set by NMBI to register as either a RANP or a RAMP.

NMBI’s policy for registration as an RANP or RAMP includes two pathways. Path One applies to applicants who successfully complete the NMBI approved Masters of Science in Advanced Practice (Nursing/Midwifery) programme and may apply for registration as an ANP/AMP, in the same way as a nurse/midwife who has obtained any other registerable post-graduate qualification. Applicants not already a registered prescriber may apply for registration at the same time as applying for registration as an advanced practitioner.
For further details of the specific criteria required to apply for registration as a RANP/RAMP, please visit the NMBI website.

Path Two applies to nurses and midwives who have attained the NMBI competencies and capabilities of advanced practice through a developmental pathway and can apply to be recognised as an ANP/AMP. Applications will be reviewed against the criteria and standards of NMBI for advanced practice on a case-by-case basis. To apply for registration applicants must:

- Be a registered nurse or midwife with NMBI;
- Be registered in the division(s) of the NMBI Register for which the application is being made;

or,

- in recognition of services that span several patient/client groups and/or division(s) of the Register, provide evidence of validated competencies relevant to the context of practice;
- Hold a Master’s degree (or higher) in nursing/midwifery or a Master’s degree which is relevant, or applicable, to the advanced field of practice. The Master’s programme must be at Level 9 on the National Framework of Qualifications (Quality & Qualifications Ireland), or equivalent. Educational preparation must include at least three modular components pertaining to the relevant area of advanced practice, in addition to clinical practicum.

The MSc Advanced Practice (Nursing/Midwifery) that leads to registration as an RANP/RAMP is available at:

- AIT
- DKIT
- GMIT
- LYIT
- MTU
- NUIG
- RCSI
- TCD
- UCC
- UCD
- UL
- WIT
This publication is aimed at those interested in applying for entry to the pre-registration honours degree programmes in nursing and midwifery in 2022. It has been published on an annual basis since 2005.
